

Please read the [Instruction Manual] carefully and make full understanding of the details noted in the contents before use.

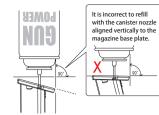

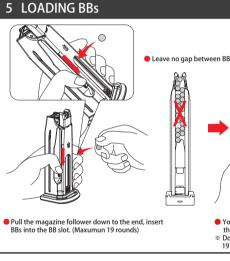

1 PART DESCRIPTION

TAIWAN

4 CHARGING GAS

Please turn the magazine up side down to keep the injection hole side up, fill the gas only when the canister is verticalize to the injection hole. The gas will not be filled into the magazine or will *If you fill the magazine with gas and fire dozens of shots leak out if the canister is not verticalized to the iniection hole.

6 Loading

1. Insert the magazine. 2. Pull the slide to the end and hold (the hammer will be pressed down). 3. Release the slide (the slide is held at the back at the moment). 4. Press the slide catch downward, the slide will be pushed forward (a BB pellet will be loaded into the barrel). 5. Pull the trigger to fire.

Precautions while filling

% If you fill the magazine with a non-vertical way from up. towards down, and caused the magazine is not completely filled, please deflate the gas completely, and refill the gas one more time as instructed. Normally we recommend to fill the gas for 7-10 seconds. If you cannot count accurately, check if there is sound of flowing gas in the canister. If not, then the pressure in the canister and the magazine have reached their balanced. Please use your magazine under normal temperature

If you operate in environment of 20°C or below, the gas pressure will drop and might cause abnormal functions. (The magazine will work normally again when temperature returns to normal temperature.) # If operate in environment of 35°C or above the gas pressure will be too high and might cause abnormal unctions. (The magazine will work normally again when nperature returns to normal temperature.) even under normal temperature, the gas pressure will also drop and cause the gas temperature to drop. Prepare several spare magazines for exchange is recommended.

ARNING • ATTENTION

Please avoid to touch the njection hole. It might cause rostbites or low temperature burns if the gas adheres to the

- maintain the magazine Magazines are very delicate par opping them may cause damage or abnormality. Please avoid foreign matter nains on the magazine lip an ection hole on the magazine
- which may cause abnormality If refilling is necessary, please avoid to proceed when the agazine is loaded. Please unl magazine before proceed. Please do not place the nagazines in wet or waterv nlaces, which may cause

RNING • ATTENTION

Do not release the

magazine lip.

magazine follower

abruptly while pressing the follower. Releasing the follower carelessly may damage the

SHOOTING

Switch the safety to FIRE.

- 2. Load the pistol according to step 6. 3. Pull the trigger to fire (a BB pellet will be fired and
- the slide will be pushed backward).

Safety device —

o prevent misfiring, keep your

the trigger guard when you are
